FineCross® M3
Coronary Micro-Guide Catheter

OPTIMAL GUIDEWIRE **SUPPORT** AND SUPERIOR **CROSSABILITY**[1]

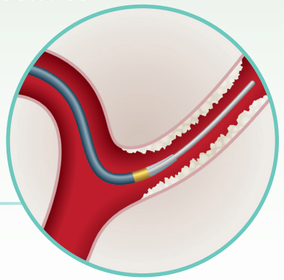
FINECROSS® M3 Coronary Micro-Guide Catheter is designed to provide the ultimate balance of properties for access and crossing of complex lesions.

- 1.7 Fr tapered distal tip is designed for improved crossability and guidewire handling[1]
- Next Generation Hydrophilic Coating, with its unmatched and most durable lubricity, provides excellent trackability and crossability[1]
- 15 cm floppy distal segment allows for improved trackability
- Tapered stainless steel braid construction is designed for optimal guidewire support

PROVEN TECHNIQUES TO **OPTIMIZE YOUR APPROACH**

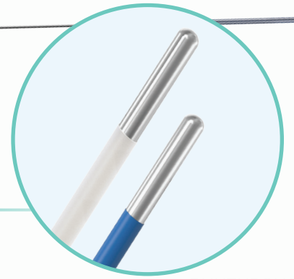
Access and cross simple to complex lesions using FINECROSS® M3 Coronary Micro-Guide Catheter with RUNTHROUGH® NS Coronary Guidewires

SUPPORT
for Side-branch or Acute Bifurcation Lesions



Use FineCross® M3 Coronary Micro-Guide Catheter
with Runthrough® NS Extra Floppy Coronary Guidewires

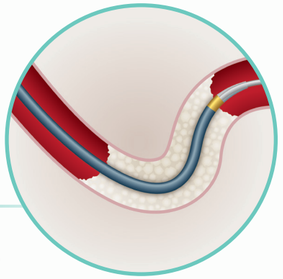
TRACKABILITY
for Distal or Torturous Lesions



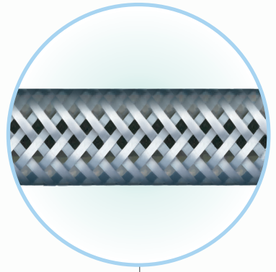
Use FineCross® M3 Coronary Micro-Guide Catheter
with Runthrough® NS Izanai™ Coronary Guidewires

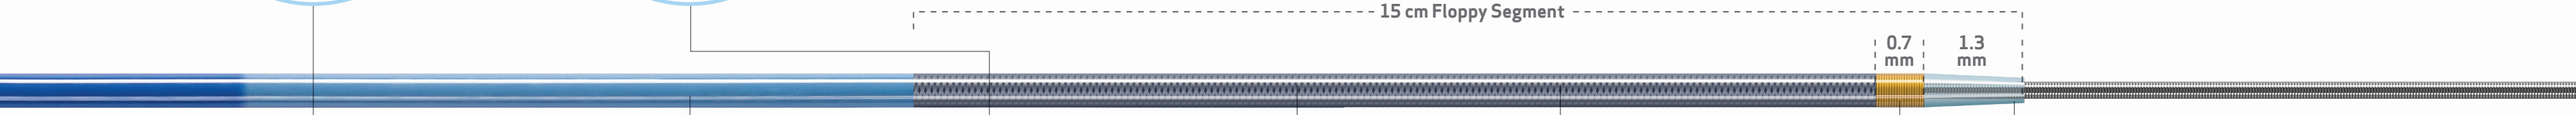
RUNTHROUGH NS Izanai is available in blue and white for simple identification of secondary wires

CROSSABILITY
for Tight Stenotic or Calcified Lesions



Use FineCross® M3 Coronary Micro-Guide Catheter
with Runthrough® NS Hypercoat™ Coronary Guidewires





Tapered Distal Tip
Tapered ID and OD along the length of the catheter for unsurpassed crossability[2]
Outer proximal diameter: 2.5 Fr
Outer distal diameter: 1.7 Fr

Next Generation Hydrophilic Coating
Durable lubricty provides excellent crossability and trackability

Stainless Steel Braided Mesh
Provides guidewire support for improved pushability

Floppy Distal Segment
Distal 15 cm flexible length improves trackability through tortuous anatomy

PTFE Inner Layer
Reduces friction and improves guidewire handling

Gold Radiopaque Marker
For enhanced visibility that facilitates accurate placement

Soft, Atraumatic Distal Tip
1.7 Fr entry profile, tapered distal tip for optimal guidewire handling and improved crossability
